Always at lowest market rates. Write for prices.

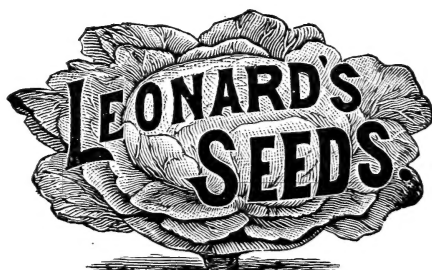

SEED POTATOES.

Our Seed Potatoes have been carefully grown in the sandy soil of Northern Michigan (which is known as the Potato Country), and are all especially selected. It is well known that seed potatoes grown in the North yield more bushels per acre, larger and smoother potatoes of a better quality, and are also better keepers than those grown from Southern or Western stock.

LEONARD'S

YELLOW GLOBE

ONION—LEONARD'S YELLOW GLOBE.

This stock gives better satisfaction for general use than any other. It forms a large sound bulb; has a small neck and dries down uniformly, which makes the harvesting easy. It is a fine keeper, does not split and get unshapely but winters over splendidly and keeps until new onions come in prime condition always. We think it is the best onion for ordinary purposes. We have recommended it as the best for the past five years. Lb. \$1.25.

HOLLAND CABBAGE.

This is the cabbage which has been selling at such high prices on the Chicago market for the past three years. It is the hardest heading, finest grained and best keeper of any cabbage known. The seed is in great demand by our home gardeners. Lb. \$3.00.

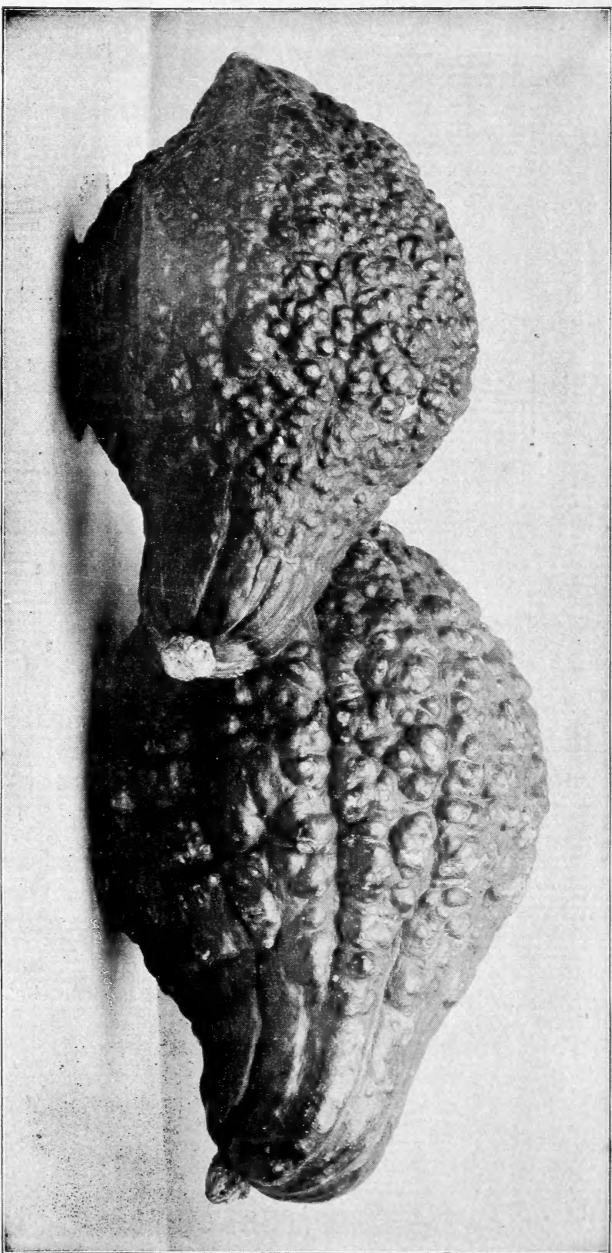

SQUASH—LEONARD'S CHICAGO WARTY HUBBARD.

See Illustration on Back of Cover.

This strain of Hubbard Squash is one of my best new things for 1894. I offer it to the general trade with every confidence in its superiority. It is the best strain of Hubbard squash that I know of. Further description found on page 14 of our illustrated catalogue. Lb. 60c.

For price and description of this Squash see inside of Cover.

LEONARD'S CHICAGO WARTY HUBBARD SQUASH.
